a) pleased she had done the trip. b) keen to make another long trip. c) nervous about seeing her family again. +

Reading

Task 2. Read the passage about Lake Vostok. There are seven words with a letter and an asterisk (*) beside them. This symbol is used in scientific texts to provide explanations for non-scientific readers. Match each explanation below (1–7) with the correct letter A–G from the passage.

- * B An inspection or investigation of an area, often used for making maps.
- * E Causing harmful effect and damaging the purity of something.
- * G A machine that is automatically programmed to perform a number of tasks, often dangerous or boring ones.
- * C A way of using radio signals on a screen to look at things that cannot normally be seen.
- * F Very small organisms that live in the air, water, soil, plants and animals.
- * A A settlement in a distant part of a country, used for trading, military or scientific purposes.
- * D A tool or machine used to make holes in something

Lake Vostok lies about 1,500 kilometres east of the South Pole, near Russia's Vostok station, a scientific outpost* (**A**) that has experienced the lowest temperatures ever recorded on Earth: minus 89.2°C.

What is unique about this lake is that nobody has ever set foot on its shores. Like the oceans of the planet Jupiter's moon Europa, it is completely covered by ice.

The first person to realise the existence of Lake Vostok was the Russian geographer,

Andrei Kapitsa. While flying over this frozen region in 1960, he noticed an unusually flat area and thought there might be a lake under the ice. However, his suggestions were not taken seriously at the time and it was only after a British-led survey* (B) used radar* (C), that it became clear that there was water there.

Lake Vostok's ice covering is 4 kilometres thick, its water is up to 500 metres deep and it has been completely covered in this way for at least one million years. In 1988 special hot-water drills* (D) were used to get through the ice to within 120 metres of the lake. Work then stopped to avoid pollution* (E). Samples were taken from the ice and found to contain living bacteria* (F) and even some grains.

Scientists now want to send a robot*(G) down to explore and search for signs of life. If life can exist in this lake covered by ice, maybe it can also exist in the ice-covered oceans of Jupiter's moon.

8. What makes Lake Vostok different from other lakes is that it is
- so near the South Pole.
 - on Jupiter's moon, Europa.
 - being explored by robots.
 - completely covered by ice.
9. Nobody has yet got through to the waters of the lake because
- the ice is too thick.
 - they are afraid of polluting it.
 - they are worried about disease from the bacteria.
 - you can only see the lake on radar.
10. Lake Vostok could be a very important scientific discovery as it could show
- how life can survive in extreme conditions.
 - how long Earth has existed.
 - how robots work.
 - how scientists write reports on their discoveries.

Writing

Task 4. Libraries aren't very popular with modern teens. Write a short article into your local newspaper expressing your opinion.

Remember to mention:

- why libraries appeared;
- if you and your friends go to the school library or any;
- what modern libraries offer to their visitors;
- what the future of libraries is;
- conclude your article with an appeal to your readers.

Libraries has appeared because there was too many important things people wanted to remember. In our days, libraries offer to their visitors lots of various books of any genre. Everybody can find ~~anything~~ something that will match their own criterias. I, personally, don't go to libraries. I prefer reading online because in my opinion that's an easier way than to go to a special place. But I think they will exist no matter what. There will always be lots of appreciators of libraries. In conclusion, just read if you enjoy it.

WRITING

Task 5. Your English teacher has asked you to write a story.

The story must begin with this sentence: *Just as the film began, I received a text message on my mobile phone...*

Don't forget to mention in your story:

- who you were with;
- what kind of film it was;
- who sent you the message;
- what had happened;
- what you did.

10-6
Just as the film began, I received a text message on my mobile phone. It was from my friend. "Where are you? I'm waiting", it said. I was confused as I was sure my friend was sitting next to me and had just left for the bathroom. "What do you mean?" I asked. "You were here a minute ago". To which my friend replied with "I never went inside the cinema". And that's when I got scared. You see, the movie we were going to watch was a horror film, a story of a boy who found out that he had an evil clone pretending to be him to all of his friends. Then I ~~heard~~ heard footsteps. I stared at the figure getting closer and closer to my seat and when I saw her face I suddenly realized... It was nothing like my friend's face. I just assumed she was my friend because they had the same hair. I ran out of the cinema laughing and ended up watching the rest of the film together with my friend.
